Assignment - Task Board
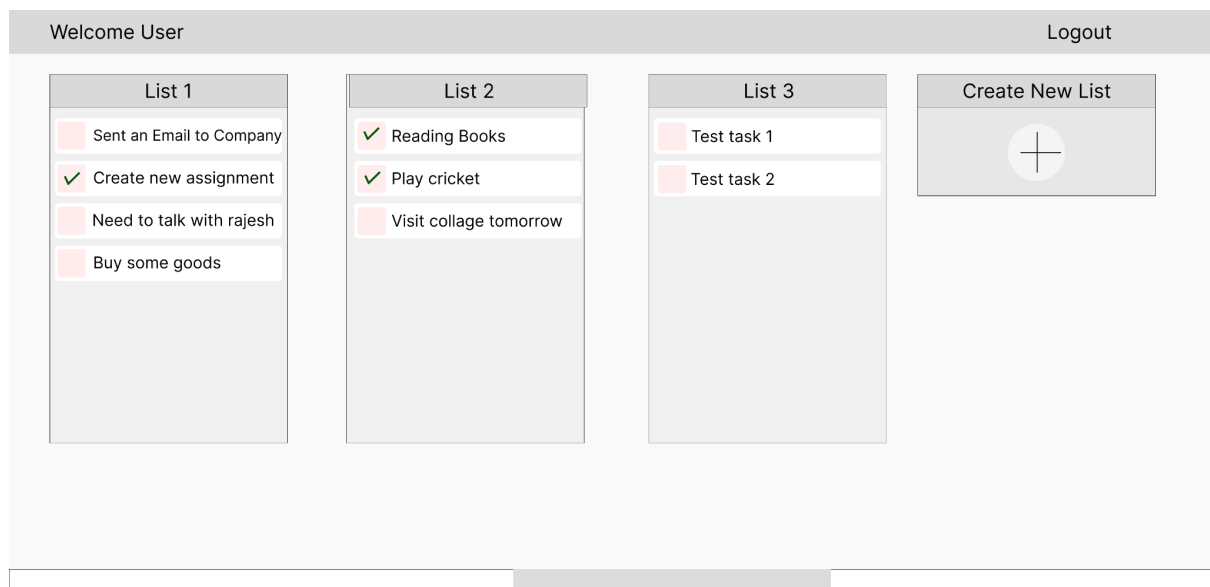

You have to design user task board based on html draggable properties with using **NodeJs, ExpressJs, React and for database you have to use postgres with Sequelize node module**, points to be covered are as follows

1. User can login with id and password - User and Password in DB
2. A user can create multiple lists - lists should be saved in DB
3. He can drag task from one list to another and data should be saved in database too.
4. When user move task to another list then it should update list id in task in DB
5. User can scroll multiple list horizontally
6. User can mark Task completed and it will be removed from the list

Here i am also attaching UI screens :-

Screen Render -1

Welcome User			Logout
List 1	**List 2**	**List 3**	**Create New List**
☐ Sent an Email to Company	✓ Reading Books	☐ Test task 1	+
✓ Create new assignment	✓ Play cricket	☐ Test task 2	
☐ Need to talk with rajesh	☐ Visit collage tomorrow		
☐ Buy some goods			

Screen Render 2 - After Dragable

Welcome User   Logout

List 1	List 2	List 3	Create New List
Sent an Email to Company	✓ Reading Books	Test task 1	
✓ Create new assignment	✓ Play cricket	Test task 2	
Need to talk with rajesh	Visit collage tomorrow		
	Buy some goods
